

COVID-19 is the infectious disease caused by the most recently discovered coronavirus. Scientists and Biotechnologists are continuously working towards the development of diagnostic kits and possible solutions to combat the spread of diseases. In response to the growing COVID-19 pandemic and shortages of laboratory-based molecular testing capacity and reagents, multiple diagnostic test manufacturers have developed and begun selling rapid and easy-to-use devices to facilitate testing outside of laboratory settings.

BSC BioNEST Bio-Incubator (BBB), being the leading Bio-Incubator in Delhi-NCR, is supporting the Incubatee companies to develop innovative solution for the pandemic. The startup ecosystem of the facility motivates young startups to solve the global issues related with biotechnology and healthcare. Currently seven (7) incubatee companies are working to find innovative solutions for COVID-19.

**India Fights against COVID under 'Aatmanirbhar Bharat' Initiative**

We feel proud announce that Covid-19 Real time PCR kit and Viral RNA purification kits, both developed by our incubatee company (InnoDx Solutions Pvt. Ltd) has passed the validation of ICMR conducted at NIV-Pune.

**Congratulations to InnoDx Solutions Pvt. Ltd and its team for this achievement**
